PEMBROKE PRIVACY

CIPP/E, CIPM & AIGP TRAINING

DISTINGUISH YOURSELF

WITH IAPP TRAINING AND CERTIFICATION

Advance your career, increase your earning potential and be a hero at your workplace. A certification from the IAPP validates your knowledge in data privacy – making you a key asset wherever you work. Our team of trainers are experienced data protection practitioners and as well as expert trainers. They draw on their hands on experience working with clients to create and implement robust data protection programmes. Our trainers engage with the Irish Data Protection Regulator and other European Regulators on an ongoing basis and they will share their experience and understanding of how practices will be viewed by Regulators even where there is no formal guidance.

TOP 5 BENEFITS OF AN IAPP CERTIFICATION

- IAPP Certifications are the global industry standard for professionals entering and working in the field of privacy.
- Achieving an IAPP credential demonstrates understanding of a principles-based framework and knowledge of information privacy.
- You'll be recognised as part of an elite group of knowledgeable, capable and dedicated privacy and data protection practitioners.
- Holding an IAPP designation elevates your leadership profile among your colleagues.
- An IAPP Certification is a key benchmark among top employers for hiring and promoting privacy professionals and opens the door to higher earning potential.

CERTIFIED INFORMATION PRIVACY PROFESSIONAL / EUROPE

CIPP/E MODULES COVERED

IAPP Certifications are the global industry standard for professionals entering and working in the field of privacy and data protection. Achieving an IAPP credential demonstrates understanding of a principles-based framework and knowledge of information privacy. You'll be recognised as part of an elite group of knowledgeable, capable and dedicated privacy and data protection practitioners. This course is ideal for DPOs and people who have responsibility for data protection compliance in their organisation but who do not necessarily have a legal/data protection background.

Module 1:
Data Protection Laws

Introduces key European data protection laws and regulatory bodies, describing the evolution toward a harmonised legislative framework.

Module 2:
Personal Data

Defines and differentiates between types of data, including personal, anonymous, pseudo-anonymous and special categories.

Module 3:
Controllers and Processors

Describes the role and relationships of controllers and processors.

Module 4:
Processing Personal Data

Defines data processing and GDPR processing principles, explains the application of the GDPR and outline the legitimate bases for processing personal data.

Module 5:
Information Provision

Explains controller obligations for providing information about data processing activities to data subjects and supervisory authorities.

Module 6:
Data Subjects' Rights

Describes data subjects' rights, applications of rights and controller and processor obligations.

Module 7:
Security of Processing

Discusses considerations and duties of controllers and processors for ensuring security of personal data and providing notification of data breaches.

Module 8:
Accountability

Investigates accountability requirements, including data protection management systems, data protection impact assessments, privacy policies and the role of the data protection officer.

Module 9:
Cross-border data transfers

Outlines options and obligations for transferring data outside the European Economic Area, including adequacy decisions and appropriate safeguards and derogation.

Module 10:
Supervisions and Enforcement

Describes the role, powers and procedures of supervisory authorities; the composition and tasks of the European Data Protection Board; the role of the European Data Protection Supervisor; and remedies, liabilities and penalties for non-compliance.

Module 11:
Compliance

Discusses the applications of European data protection law, legal bases and compliance requirements for processing personal data in practice, including employers processing employee data, surveillance, direct marketing, Internet technology and communications and outsourcing.

IAPP CERTIFIED INFORMATION PRIVACY MANAGEMENT

CIPM MODULES COVERED

IAPP Certifications are the global industry standard for professionals entering and working in the field of privacy and data protection. Achieving an IAPP credential demonstrates understanding of a principles-based framework and knowledge of information privacy. You'll be recognised as part of an elite group of knowledgeable, capable and dedicated privacy and data protection practitioners. This course is ideal for DPOs and people who have responsibility for data protection compliance in their organisation but who do not necessarily have a legal/data protection background.

Module 1:
Introduction to privacy program management

Identifies privacy program management responsibilities and describes the role of accountability in privacy program management.

Module 2:
Privacy governance

Examines considerations for developing and implementing a privacy program, including the position of the privacy function within the organisation, role of the DPO, program scope and charter, privacy strategy, support and ongoing involvement of key functions and privacy frameworks.

Module 3:
Applicable laws and regulations

Discusses the regulatory environment, common elements across jurisdictions and strategies for aligning compliance with organisational strategy.

Module 4:
Data assessments

Relates practical processes for creating and using data inventories/maps, gap analyses, privacy assessments, privacy impact assessments/data protection impact assessments and vendor assessments.

Module 5:
Policies

Describes common types of privacy-related policies, outlines components and offers strategies for implementation.

Module 6:
Data subjects rights

Discusses operational considerations for communicating and ensuring data subject rights, including privacy notice, choice and consent, access and rectification, data portability, and erasure and the right to be forgotten.

If you would like more information, please don't hesitate to contact us.

IAPP CERTIFIED INFORMATION PRIVACY MANAGEMENT

Module 7:
Training and awareness

Online strategies for developing and implementing privacy training and awareness programs.

Module 8:
Protecting personal information

Examines a holistic approach to protecting personal information through privacy by design.

Module 9:
Data breach incident plans

Provides guidance on planning for and responding to a data security incident or breach.

Module 10:
Measuring, monitoring and auditing program performance

Relates common practices for monitoring, measuring, analysing and auditing privacy program performance.

If you would like more information, please don't hesitate to contact us.

CERTIFIED AI GOVERNANCE PROFESSIONAL

AIGP MODULES COVERED

AIGP training teaches how to develop integrate and deploy trustworthy AI systems in line with emerging laws and policies. The curriculum provides an overview of AI technology, survey of current law and strategies for risk management, among many other relevant topics.

Module 1:
Foundations of artificial intelligence

Defines AI and machine learning, presents an overview of the different types of AI systems and their use cases, and positions AI models in the broader socio-cultural context.

Module 2:
AI impacts on people and responsible AI principles

Outlines the core risks and harms posed by AI systems, the characteristics of trustworthy AI systems, and the principles essential to responsible and ethical AI.

Module 3:
AI development life cycle

Describes the AI development life cycle and the broad context in which AI risks are managed.

Module 4:
Implementing responsible AI governance and risk management

Explains how major AI stakeholders collaborate in a layered approach to manage AI risks while acknowledging AI systems' potential societal benefits.

Module 5:
Implementing AI projects and systems

Outlines mapping, planning and scoping AI projects, testing and validating AI systems during development, and managing and monitoring AI systems after deployment.

Module 6:
Current laws that apply to AI systems

Surveys the existing laws that govern the use of AI, outlines key GDPR intersections, and provides awareness of liability reform.

Module 7:
Existing and emerging AI laws and standards

Describes global AI-specific laws and the major frameworks and standards that exemplify how AI systems can be responsibly governed.

Module 8:
Ongoing AI issues and concerns

Presents current discussions and ideas about AI governance, including awareness of legal issues, user concerns, and AI auditing and accountability issues.
